

Avery Product Safety Sheet

issued: 13/03/2001

Avery® FasCal® and Avery® Fasign® self-adhesive films can be considered as safe products as defined in EEC council directive 92/59 of June 29, 1992. Therefore, material safety data sheets as referred to in Directive 88/379/EEC, article 10 and 91/155/EEC are not applicable to FasCal self-adhesive films.

GENERAL INFORMATION

Health

To our best knowledge Avery Fascal and Avery Fasign self-adhesive and heat activated films do not present undue health hazards under normal conditions of use, handling and storage.

Handling and conversion

Normal safety principles in handling and conversion should be applied.

Environment

- Avery FasCal self-adhesive films do not contain cadmium or cadmium compounds.
- Avery FasCal self-adhesive films do not contain Ozone Depleting Materials.
- Avery Fasign Retro-reflective films do neither contain cadmium or cadmium compounds, nor Ozone Depleting Materials

Waste disposal

Generally, the waste can be disposed of by routine waste disposal through governmental licensed facilities as usual for ordinary waste materials.

Note: This information is based on the present state of our knowledge but no warranty, express or implied is made. If you need further information, please consult your local Avery Dennison films supplier.
